DETAILED ACTION

Election/Restrictions

1. Claims 4, 7-9, 14-16, and 24-25 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected Species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 3.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3, 5, 6, 10-13, and 17-19 rejected under 35 U.S.C. 102(b) as being anticipated by Bowman et al (5,742,491).

Bowman et al discloses a transformer having primary and secondary windings (202, 204), first and second switching circuits (206, 205), first and second complementary control circuits (630, 610, 605), a filter circuit including an inductor (230) and a capacitor (235); input circuit including third and fourth switching circuits (222, 201) wherein the first complementary control circuit being disposed between the first and third switching circuits (via Delays & Drivers), and the secondary complementary control circuit being disposed between the second and fourth switching circuits (via Delays & Drivers); and the complementary circuit including an inverter (604), a resistor (602), a diode (606), and a capacitor (603). See figure 6.

Art Unit: 2838

4. Claims 1-3, 5, 6, 10, 11, 13, and 17-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Boylan et al (6,618,274).

Boylan et al discloses a transformer having primary and secondary windings, first and second switching circuits (Q6, Q5), first and second complementary control circuits, a filter circuit including an inductor (L1) and a capacitor (C3); input circuit including third and fourth switching circuits (Q2, Q1) wherein the first complementary control circuit being disposed between the first and third switching circuits, and the secondary complementary control circuit being disposed between the second and fourth switching circuits (see figures 3A, 3C, 5).

Allowable Subject Matter

5. Claim 23 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
